

Friday 24th June 2022

Due in 30th June 2022

**This week/
Next week**

English

We will continue our learning based on how the author of 'Anatomy – A cutaway look inside the human body.' has constructed and organised the paragraphs cohesively, collecting facts about the heart and organising these into paragraphs. We will also be reviewing our English learning from the year.

Maths

This week, we've been measuring the area of squares, rectangles and irregular polygons, looking at ways to calculate this efficiently. Next week, we will be finishing our chapter on area and perimeter and starting our learning on volume. In addition to this we will be reviewing our learning from the whole year so far.

Topic

In Science, we will be investigating the effect of exercise on our heart rate and looking at the impact of diet on the way our bodies' functions. We will be continuing using Scratch to create quizzes in computing. In PSHE, we will be doing our second lesson on changes during puberty. The children are encouraged to ask questions in school or at home. They have the opportunity to ask these anonymously if they would rather.

Key Dates

Dartmoor trip – CHANGE OF DATE – Monday 4th July.

**Homework
Task**

To revise the difference between perimeter and area, you could:

- Create a perimeter and area poster, showing what each are and how they are calculated.
- Explain how you would teach younger children the concepts.
- Write some word problems relating to area and perimeter. State clearly which of the 2 concepts each question is about and show how the answer would be calculated.

**Key Skills
tasks**

Expected from all children.

- 3 x 20 minutes of reading independently or with an adult.
- 2 x 15 minutes of times table rock stars or timetable practice.
